### Logging

In the login window actions executed by MTPWin are recorded with a time stamp.

## Folders for Synchronization

The following folders are synchronized between LogiScan and Windows PC:

- data** used to transfer the captured by LogiScan data to Windows PC.
- upload** used for transferring files to be loaded by the Windows PC to LogiScan.
- update** serves for the transfer of app updates from Windows PC to LogiScan.

These folders are located under on the LogiScan under `aitronic` and on the Windows PC under `C:\ProgramData\aitronic\MTPWin`.

### LogiScan-15xx/17xx

### Windows-PC

The synchronization takes place according to the following rules::

### Folder data

- The LogiScan provided by the in this directory available files whose first character "~" is not equal to be taken over by MTPWin and filename is LogiScan on a "~" is prefixed.
- If the file already exists with the same name on the Windows PC, the file name "(s)" is appended, where "n" is a sequential number of 2 n ...

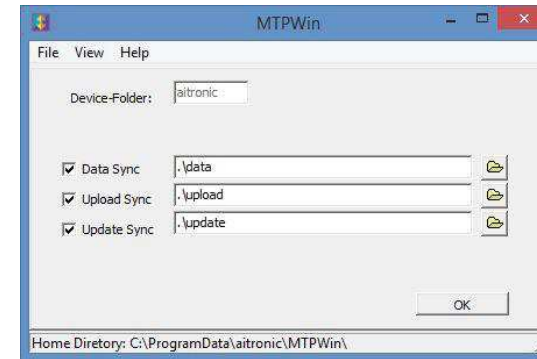

### Folders upload and update

- A file is transferred from MTPWin to the LogiScan, if no file (either with or without "~" as the first character in the file name) exists with this file name on the LogiScan. After taking over the file through an app on the LogiScan the filename is a "~" is prefixed.
- A file on the LogiScan whose first character is "~" and which exists no longer on the Windows PC, will be deleted by MTPWin,

## Program Functions

After clicking **View** one can choose between **Config** and **Logging**.

### Config

In the Config window

- the synchronization for data, upload and update can be activated/deactivated
- the directory paths can be specified.
